Profile Summary

Driven and ambitious backend developer with a strong foundation in **JavaScript**, **Express.js** and **MongoDB**. Eager to learn and adapt to new technologies and frameworks. Seeking opportunities to innovative project and grow as professional in the dynamic world of backend development.

Experience

Gurucool

July 2023 – August 2023

Backend Developer Intern

Jaipur, Rajasthan

- Efficiently resolved daily bugs to maintain application stability and enhance user experience.
- Contributed to performance improvements through code optimization techniques.
- Successfully developed and implemented new features to expand product functionality.
- Demonstrated strong collaboration skills through timely and high-quality code contributions via multiple accepted merge requests.

Projects

Chillzone-API | [GitHub](#) | *Node.js, Express.js, Mongoose*

December 2023

- Created a robust API enabling users to authenticate login, signup, logout, and logout from all devices, manage social interactions post, comment, like, and establish friendships.
- Integrated **JWT** for secure **authentication and authorization**, ensuring data protection and session management.
- Utilized **Cloudinary** for efficient and scalable image storage and management within the application.
- Implemented detailed error-handling mechanisms, standardized API responses, and followed best practices for modular folder structure, enhancing code maintainability and readability.

TubePulse-API | [GitHub](#) | *Node.js, Express.js, MongoDB*

November 2023

- Created a customized API similar to YouTube, enabling users to upload videos, like videos, comment on videos, subscribe to other user channels, and create video playlists.
- Integrated **JWT** for secure authentication and authorization, ensuring data protection and session management.
- Integrated **Cloudinary** for efficient and scalable image storage and management within the application.

Ecommerce API | [GitHub](#) | *Node.js, Express.js, MongoDB*

November 2023

- Spearheaded the development of an e-commerce API facilitating seamless product management, cart functionality, and streamlined order processing for user.
- Implemented robust **authentication and authorization** mechanisms using **JWT**, ensuring secure access to the API's functionalities.

Auth-API | [GitHub](#) | *Node.js, TypeScript, Express.js, MongoDB*

October 2023

- Developed an API that allows users to register, login, and logout, providing a seamless user experience..
- Utilized **jsonwebtoken** for robust authentication, ensuring secure access to sensitive user information.

Technical Skills

Programming Languages: JavaScript, Java, C++, Python, TypeScript, HTML/CSS

Databases: MongoDB, Firebase, MySQL

Developer Tools: VS Code, Git, Github, Gitlab

Frameworks: Node.js, Express, React.js, FastAPI, Django, Next.js, Bootstrap, Tailwind css

Additional Skills: DSA, OOPS

Soft Skills: Communication, teamwork

Education

Archana Devi Degree College

2021 – 2023

Bsc in Science

Allahabad, Uttar Pradesh

Intermediate / Modern Enter College

2016 – 2017

Biology

Allahabad, Uttar Pradesh

Trainings

Coding Ninjas

Dec 2022 – Sep 2024

Full Stack Web Development
